NSF Safe and Inclusive Working Environment Plan for Off-Campus or Off-Site Research

NSF's new <u>PAPPG</u> (Proposal & Award Policies & Procedures Guide), is effective for proposals with off-campus or off-site work on or after January 30, 2023. The PAPPG requires researchers to certify that they have a plan for creating and maintaining <u>Safe and Inclusive Working Environments for Off-Campus and Off-Site Research</u> for that project.

Definition: NSF defines "off-campus or off-site research" for the purposes of this requirement as "data/information/ samples being collected off-campus or off-site, such as fieldwork on research vessels and aircraft."

Instructions for NSF Principle Investigators

- 1. Determine whether any "off-campus or off-site research" will occur on the NSF-funded award.
- 2. Complete the NSF Safe and Inclusive Working Environment (SAI) Plan for Off-Campus or Off-Site Research: Safe & Inclusive Working Environment Plan
- 3. Distribute the SAI Plan to everyone who will participate in the off-campus or off-site research activity prior to those individuals leaving campus to engage in the off-site or off-campus research.
- 4. Retain documentation of who received the plan and the plan itself in their personal grant files or in the departmental grant file.

IMPORTANT: The plan should not be submitted to NSF unless requested.

Safe & Inclusive Working Environment Plan: Required Elements

- 1. A brief description of the field setting and unique challenges for the team;
- 2. The steps the proposing organization will take to nurture an inclusive off-campus or off-site working environment, including processes to establish shared team definitions of roles, responsibilities, and culture;
- Communication processes within the off-site team and to the organization(s) that minimize singular points within the communication pathway; and
- 4. The organizational mechanisms that will be used for reporting, responding to, and resolving issues of harassment if they arise.

Are SAI Plans required for all NSF proposals with off-campus or off-site research?

- Yes, SAI Plans are required for all NSF proposals with off-campus or off-site research.
- Currently only NSF's BIO and GEO proposals are requiring the <u>submission</u> of a SAI Plan that will be considered as part of the Broader Impacts criteria during the review process.
- The plan <u>should not be submitted</u> for any other NSF directorate unless specified in the FOA. The PI must have the plan on file and be ready to provide it to NU or NSF upon request.

Compliance Check

- ✓ PI acknowledges that there will be off-campus or off-site research involved in their project.
- ✓ PI completes a Safe and Inclusive Working Environment Plan for Off-Campus or Off-Site Research.
- ✓ Prior to departing for the off-site or off-campus research, PI distributes the SAI plan to all members of the team. PI maintains a record confirming everyone has read, understood and approves of the SAI plan.
- ✓ PI maintains a record of the SAI plan in their files and/or departmental grant files.
- ✓*PIs with BIO & GEO proposals submit the SAI plan to NSF*
